- **Aeris Active**
- For non food preparation surfaces, leave to dry for effective bacterial protection for up to 7 days'
- Wipe
- Rinse food contact surfaces & items such as utensils, cutting boards, cookware with potable water before re-using where required.

PRODUCT OVERVIEW

- ✓ Hospital-grade disinfection
- ✓ Antibacterial protection for up to 7 days or 200 touches
- ✓ TGA listed

Aeris Active™ is compatible with the vast majority of both natural and synthetic surfaces prone to microbial colonisation.

Aeris Active™ helps long-term microbial control with its patented quat-polymer invisible protective film, ensures that your surfaces remain germ free. The film does not impact how the surface is used, leaving the treated surface cleaner and safer for a longer period of time.

For direct food contact surfaces such as cutting boards & utensils, once clean & disinfected with Aeris Active, rinse with clean potable water before re-use where required.

Aeris Active™ has triple action benefits:

- ✓ Kills germs, broad spectrum bactericidal & viricidal
- ✓ Kills & removes mould & mildew
- ✓ Removes discolouration caused by mould and remnants of dead organisms
- ✓ Leaves behind an invisible film providing residual protection from recolonisation on the surface

PRODUCT NOTES

- i. Always refer to the product label instructions, SDS and IFU prior to use
- ii. Less effective on porous surfaces
